Abstract

This study, *Good Manners and Right Conduct: A Case Study on the Influence of Work Ethics on the Envisioned Success of Business*, examines how employees' work ethics—specifically good moral character, hard work, and focus—contribute to the success of a business. Using a qualitative case study approach, data were collected through interviews with employees of a milk tea shop in Poblacion, Hagonoy, Bulacan. The findings highlight that work ethics play a vital role in business growth, customer satisfaction, and employee performance. Employees with strong moral character foster positive workplace relationships and customer trust, while hardworking individuals enhance productivity and contribute to business stability. Additionally, employees who maintain focus during work hours ensure efficient service, reducing errors and improving customer experience. The study emphasizes the need for business owners to recognize and reinforce ethical behavior in the workplace. It recommends implementing training programs and policies to instill strong work ethics among employees, thereby ensuring long-term business success.
